# Product Highlights

Feilo Sylvania Group brands, Concord and Sylvania have been innovating in lighting for nearly a century. It is our aim continue this for another century and beyond.

Here are the latest additions to our 2018 specification range which embrace the quality and technology we design and manufacture into our products.

## Beacon Muse Tune

Beacon Muse Tune combines colour tuning from 2100k to 4300k with beam angle control from 8 deg to 55 deg offering unique flexibility in creating the desired effects

Location: Spotlights

## Tide

Tide is a linear track mounted or recessed luminaire for wall washing using asymmetric lens or floor lighting with symmetric beam - the perfect spotlight partner

Location: Spotlights

## Curvelyte

Curvelyte is a slimline stylish pendant luminaire designed to achieve direct / indirect lighting from a discreet luminaire perfect for meeting rooms and circulation areas

Location: Surface & Suspended

## Kometa LED

Kometa LED provides a vital design tool by combining ambient lighting with downlighting in a simple stylish luminaire with efficiency up to 99lm/w

Location: Downlights

## Colossal

Colossal is designed to compliment any interior surface mounted or as a pendant and is beautiful to look with an output of 3,800 lumens and 120lm/w efficacy

Location: Ambient Decorative

### New Upgraded Efficient Performance

- Officelyte Concave up to 148lm/w
- Mini Continuum II up to 126lm/w
- Beacon Muse II up to 20% power saving
- Beacon / Beacon Accent up to 20% power saving
- Myriad / Myriad Deco up to 117lm/w
- Glace II up to 99lm/w

## Awards

We are recognised as industry leaders

### 2013

Concord Glace **Winner**  
– Lighting Design Awards

Concord Beacon Projector  
**Finalist** – Lighting Design  
Awards

Sylvania PanellED **Finalist**  
– The Electrical industry awards

### 2014

Concord Officelyte LED  
incorporating SylSmart Control  
**Winner** – Lighting Design  
Awards

Manufacturer of the Year  
**Finalist** – Lighting Design  
Awards

### 2015

Concord Officelyte LED  
incorporating SylSmart Control  
**Winner** – Energy Managers  
Awards

### 2016

SylSmart Control -  
**Commended** – LUX Middle  
East Awards

Sylcone Retro **Winner** – RedDot  
Awards

Lumiance Insaver II -  
**Shortlisted** – Lux Awards

SylSmart Control **Finalist** –  
Energy Awards

### 2017

Smart Lighting **Shortlisted** –  
Lighting Design Awards

Concord is Made in the U.K. in our Newhaven factory

## Made In Europe

Feilo Sylvania is proud of its strong manufacturing heritage in Europe. For over 100 years, group brands: Concord and Sylvania have manufactured lamps and luminaires in Germany, France and the UK. These centres of excellence are our foundation, ensuring innovative design, development and production are aligned with the ever changing requirements of this dynamic marketplace

- **Newhaven (UK):** Concord and Sylvania
- **Saint-Etienne (France):** Sylvania luminaires
- **Erlangen (Germany):** Sylvania Lamps and Luminaires

## Certifications

All our Feilo Sylvania factories have received ISO 9001 certification from authorized certification bodies.

## Warranty

At Feilo Sylvania, we pride ourselves on the quality of our products. An LED product warranty of upto 5 years is available linked to LED rated life and subject to conditions. e.g 50,000hrs = 5 years, 30,000hrs = 3 years. Please follow the link to our website for more information <http://www.feilosylvania.com/en-gb/warranty/warranties>

**LED LUMINAIRES: 1 YEAR OF WARRANTY PER 10,000 HOURS PREDICTED LIFETIME (UP TO 5 YEARS WARRANTY):**

- No need to register, your invoice / proof of purchase is all you need
- No cap on maximum LED burning hours per year
- Traditional light source luminaires: 2 years of warranty

Concord	Lumiance	SYLVANIA

MADE EASY**

## Exploring the catalogue

All pages follow a similar format, making it easier for you to identify the information you require quickly. Generally, the page format will include the information detailed below:

- 1 Chapter colour code
- 2 Brand
- 3 Product name
- 4 Product image
- 5 Product features
- 6 Light source included
- 7 Product icons / symbols
- 8 Lamp information
- 9 Ordering guide
- 10 Photometric data and related information
- 11 Accessories or further product information
- 12 Line drawings (mm)

## Guidance for raising a product specification

In order to create a succinct specification for each product, please use the following list to select from. The relevant information can be found on either the product introduction pages at the beginning of each section or on individual product pages.

- 1 Product reference code:
- 2 Lamp type and quantity:
- 3 Gear type:
- 4 IP rating:
- 5 IK rating:
- 6 Test marks/approvals:
- 7 Beam angle/Cut off angle/surface brightness:
- 8 Adjustment - Tilt/Rotation:
- 9 LOR/DLOR/ULOR: (LED = 100%)
- 10 Cutout and recess depth:
- 11 Product dimensions:
- 12 Material specification/body/diffuser/reflector:

## Concord

## Beacon Muse II - 4,000K

### LIGHT SOURCE INCLUDED

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- Super high colour rendering index, Ra 97 typical with R9 value (saturated reds) at 90; ideal for museum and gallery applications
- Up to 1,150lm focussed at 55 degree beam
- Trailing Edge, on-board dimming potentiometer, DALI or SylSmart scene setting versions available. Silver versions on request
- For mounting on L1 1-circuit track (Lytspan 1) or L3 3-circuit track (Lytspan 3)
- Available in 3,000K or 4,000K colour temperatures
- Snap fit accessories (Elongation lens, Softener lens, Honeycomb filter, Barn door and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

### Trailing edge dimmable - 21W

Code	Description	Colour

# RECESSED MODULAR

**Concord**

12 Officelyte Classic

- High Efficiency and High Output versions for LED
- Designed to provide light onto horizontal ceiling surfaces, to assist with LG7 compliance
- Low Glare UGR <19
- Unique patented design incorporating satin prismatic wings and a Conical De-glaring Prism (CDP) centre panel
- Enclosed design reduces dust ingress and improves Luminaire Maintenance Factor (LMF)
- Slot-in wing design allows for quick and simple installation, maintenance and cleaning
- 3,000K versions available upon request
- Custom product solutions to suit different ceiling grid systems - available on request

## LIGHT SOURCE INCLUDED

# SURFACE & SUSPENDED

## Concord

- 16 Curvelyte
- 19 Mini Continuum II
- 28 Unity II

- Concord Curvelyte exemplifies a high level detail aesthetic which appeals to designers within the built environment seeking a minimalist design. With its curved lines for a clean, sharp and sleek architectural look Curvelyte is unique.
- Not just a pretty face, Curvelyte is also innovative featuring an LED light guide with a double row of LEDs providing both direct and indirect light distribution.

## Curvelyte

- Unique curved lighting shape perfect for offices, schools and conference rooms
- Direct - Indirect (70/30) lighting for ambient illumination
- UGR 19 versions for visual comfort LG, (Low Glare)
- Uniform light for aesthetics
- Powered through suspension cable for easy installation and low visual impact
- Surface mount accessories are available in different colours and shapes to enhance ceiling appearance
- Highly efficient - up to 131 lumens / Watt
- L90B10 @ 50,000 hours., Long service life with lumen maintenance of 90% at 50,000 hours
- Low LED flicker <5%
- Color Rendering Index (Ra)>80 for office applications
- LED Color consistency between luminaries <3 SDCM
- DALI (Switch-dim) dimmable
- Silver versions available upon request

- Mini Continuum II introduces a uniquely clean, simple LED lighting system offering continuous, highly uniform lines of light across walls and ceilings
- This highly versatile lighting tool can be recessed, semi-recessed, surface-mounted or suspended, either vertically or horizontally
- Available as direct/indirect or direct only distribution - both of which can be interconnected
- Every batten has a plug and socket arrangement for easy and rapid electrical installation
- Mini Continuum II Direct is available in two versions: one with an outside trim detail for plasterboard ceilings; and a trimless version for when a seamless effect is required
- Dimmable DALI versions and 3hr non-maintained integral emergency options are available as standard options
- Long lifetime : 60,000 hours life at 90% of the original output (L90)

## Mini Continuum II

- Mini Continuum II provides a perfectly clean horizontal and vertical lines of homogenous light with no shadows
- Minimalist design based on the Golden mean or ratio; which is regarded as the secret to aesthetics
- Easy and rapid installation using the plug and socket arrangement
- End caps, suspensions and connectors accessories to be ordered separately
- Colour rendering index, Ra80
- 65% downward light, 35% upward light
- White RAL 9016 as standard, other RAL colours available on request
- Direct / Indirect separate switching via DALI
- DALI versions can be installed as standard on/off switchable

### Mini Continuum II - Direct/Indirect

#### Performance Matrix

Fixture	1.2M	1.2M
Diffuser	Opal	Prismatic
Colour Temperature	4,000K	4,000K
Fixture Lumens	4032lm	3895lm
Actual Power	32W	32W
Lumens / Circuit Watt *	126lm/W	122lm/W

\*Lumens / Circuit Watt = (Fixture Lumens)/Power

Dimensions (mm)

- Mini Continuum II provides a perfectly clean horizontal and vertical lines of homogenous light with no shadows
- Minimalist design based on the Golden mean or ratio; which is regarded as the secret to aesthetics
- This versatile solution can be recessed, semi-recessed, surface-mounted or suspended; either horizontally or vertically
- Trimless (for a seamless finish) versions are available for recessed or suspended installation
- Easy and rapid installation using the plug and socket arrangement
- Colour rendering index, Ra80
- End caps, suspensions and connectors accessories to be ordered separately
- White RAL 9016 as standard, other RAL colours available
- DALI versions can be installed as standard on/off switchable

## LIGHT SOURCE INCLUDED

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

Continuum T5 - 95 mm cut-out width available upon request

- Unity looks and performs like no other light fixture by combining uplighting and downlighting in a stylish fixture
- Unity is designed for creating innovative lighting runs and spatial frameworks in open plan office spaces, corridors, receptions, classrooms and libraries
- The Unity lighting system can be suspended both horizontally and down stairs. It is also possible to create square, rectangular and long-length formations
- Available in 1.2m and 2.4m lengths
- Long lifetime : 50,000 hours life at 70% of the original output L70

## Unity II

## Modules

## Suspension mount

## Various layouts

With Unity, there are many possibilities to light a space. The organic form and design allows for non-electrical, but seamless branching of modules along any point - as each linear run is individually powered.

## Horizontal Adjustable Corner Pivot

Pivot through 90° to create custom designs

## Vertical Adjustable Pivot

Mount Unity up or downstairs or use in areas where elevation is required.

- Versatile suspended modular LED linear system
- Install horizontally or down stairwells using pivot accessories
- Create innovative lighting runs or spatial frameworks for open plan offices, corridors, classrooms or libraries
- Bi-directional lighting - 70% downwards and 30% upwards
- 1.2m and 2.4m aluminium extrusions - 'mix and match' differing lengths to create a perfect lighting system
- Rapid connector kit accessory - allowing for quick through wired installations of continuous straight runs
- PIR sensor module available
- UGR <19
- DALI, 3 hour emergency and EMPRO versions available
- 3,000K versions available on request
- White RAL9016 as standard, other RAL colours available on request
- DALI versions can be installed as standard on/off switchable

Tide Symmetric in Track with Beacon Spotlight

The new Tide range from Concord delivers clean, crisp lines of light for subtle ambient effects or wall washing of vertical surfaces. Combining LED technology and lens innovation, to provide stand alone solutions the miniaturized lighting units are housed within existing track or ceiling recessed systems - a unique Architectural Lighting solution. Asymmetric - providing perfect vertical illuminance. Symmetric - providing subtle ambient lighting around perimeters. Double Asymmetric - ideal for applications requiring illumination of walls on both sides of a corridor.

## Tide

Tide Asymmetric in Track

Asymmetric

Double-Asymmetric

Symmetric Wide

- Provides clean, crisp lines of light for horizontal or vertical surfaces
- Symmetric for subtle ambient lighting, Asymmetric for wall washing and Double Asymmetric for corridor applications
- Available in 3000K and 4000K colour temperature
- High colour rendering index, Ra 93
- Available as non dimmable or DALI dimmable versions
- For mounting on Lytespan 3 (3-circuit track)
- Lumen output up to 2000lm
- 27W power consumption
- Fixed length 600mm
- Long lifetime 60,000 hours life at 70% of the original output (L70B50)

Medium Beam

Wide Beam

Beacon Muse Tune combines tuneable colour temperature and beam angle adjustment in a single fitting, further developing the award winning Beacon range from Concord. Combining cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight, the unique soft-touch ring enables the end-user to manually adjust the beam from a wide flood (40°) down to a tight spot (10°); without the need of any additional lenses or reflectors. Additionally the colour tuning functionality allows colour temperature selection from a cool 4,300K to a warm 2,100K to tailor the lit effect to match the exact requirements of the exhibition or gallery display space.

## Beacon Muse Tune

Manual tune - black

Manual tune - white

Side profile

- Stylish combination of tuneable colour temperature and adjustable beam angle
- Tuneable white from 4,300K down to 2,100K
- Unique adjustability using soft-touch ring, enables beam control from a tight 10° spot to a 40° flood
- On-board dimming potentiometer, DALI (version 8 protocol) or SylSmart SSC Wireless versions available
- High colour rendering index, Ra90
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3). DALI L3 only
- Snap fit accessories (Elongation lens, Honeycomb filter and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >70,000 hours life at 70% of original output (L70B50)
- LED technology provides an energy efficient solution with reduced maintenance costs

## SylSmart SSC Wireless

It is a wireless, cost effective and flexible lighting control solution that can be programmed quickly and easily using the intuitive application on a smartphone..

SylSmart Standalone Scene enable users to change lighting levels and set different scenes as often as they like. No need to call specialised experts.

Creativity is at your finger tips. Have the perfect light setting for your application, product or art piece on display. Change dimming levels, colour temperature and set scenes exactly how you need them with very little effort.

Manual Beam Control

SylSmart (wireless dimming and colour tuning)

## Finite Adjustment

Beacon Muse Tune is the ultimate adjustable spotlight based on the award winning Beacon Muse. With its tuneable white LEDs which take you on a journey from warm to icy cool white, adding a sense of drama to your display.

Colour tuning can be done in either of two ways manual operation via adjustable potentiometers located at the base of the spotlight. Or wirelessly via your smartphone using our SylSmart enabled app.

Narrow Beam

Medium Beam

Wide Beam

Beacon Tune is the first tuneable white LED spotlight from Concord. Offering unique customisation through 2 on-board potentiometers, colour tuning from a cool 4,300K down to a warm 2,100K and smooth dimming from 100-0%, allowing endusers the ability to tailor the lighting to their exact preference.

The colour and quality of light can greatly influence and determine the way in which artwork, objects or fabrics are visually perceived. Beacon Tune will bring out the best in displays and exhibitions, with a high CRI of 90, making it the perfect lighting solution for Museums and Galleries.

## Beacon Tune

White

Black

- Tuneable white from 4,300K down to a warm 2,100K
- Beacon Tune is a tuneable white LED spotlight - in keeping with the award-winning Beacon design
- Ideal for museum and gallery applications for changing atmosphere from warm to cool using the same spotlight
- Smooth on-board dimming from 100 to 0%
- Individual graduated on-board potentiometers - ensuring consistency and accuracy across all installed fixtures
- Available as a Spot (26°) or Flood (42°) beam option
- Total system power: 23W
- Fixture lumens:
  - Spot (26°) = 1074lm
  - Flood (42°) = 978lm
- High colour rendering index, Ra90
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

Dimensions (mm)

Beacon Projector is part of the award winning Beacon/Beacon Muse range.

Consisting of three versions - Iris, Framing and Gobo. These impressive models meet the requirements for a fully adjustable projector in galleries, museum and retail applications.

## Beacon Projector

White Beacon Projector Iris

Black Beacon Projector Iris

Silver Beacon Projector Iris

- The Beacon Projector – Iris combines the award winning Beacon housing with a connecting snoot, manual focusing lens and a high output 26W cutting-edge LED
- The Iris component produces a circular beam which enables smaller objects to be pin pointed with light, where less than a 10° beam is necessary.
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

## Beacon Projector Iris 3,000K

Code	Description	Colour
2055968	IRIS O/B DIM L3 3,000K	White

### LIGHT SOURCE INCLUDED

Iris Projector

Dimensions (mm)

Silver Beacon Projector Framing

White Beacon Projector Framing

Black Beacon Projector Framing

- The Beacon Projector – Framing combines the award winning Beacon housing with four adjustable arms allowing the beam to be framed to the desired size shape (square/rectangle – or irregular 4 sided shapes) thus framing the object with light
- High output 26W cutting-edge LED
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

Dimensions (mm)

Black Projector Gobo

- The Beacon Projector – Gobo gives the ability to project an image, pattern or wording onto most surfaces.
- Ideal for retail and display environments
- 3 types of Gobo material can be inserted:
  - acetate
  - metal
  - glass
- High output 26W cutting-edge LED
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

Beacon XL Muse is a new addition to the innovative and award winning Beacon Muse range of spotlights. Beacon XL Muse introduces an exciting new accent and display lighting concept using cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight. The soft-touch ring enables the end-user to manually adjust the beam to from a wide flood (70°) down to a tight spot (10°); without the need of any additional lenses or reflectors.

Beacon XL Muse boasts a super high CRI of Ra97 with the R9 value at 90 - ensuring vibrant reds - the ideal spotlight for museum, gallery and retail applications where a high quality of light is required. Available with on-board, DALI or SylSmart remote dimming, a wireless technology that enables the end-user to easily control the light output via their smart device.

## SylSmart Scene Setting

- Wireless dimming of single or multiple luminaires with simple touch gestures on your smart phone
- Automatically form a wireless mesh network with the other bluetooth enabled luminaires
- Set up simple or complex scenarios with single or multiple luminaires in them. All the luminaires in one scene can have different light levels according to the needs of the end-user.
- Define the security of the network. There are four different security levels for access control.
- Control luminaires visually, by adding photographs into the app to virtually recreate the room
- The remote dimming enabled luminaires use Bluetooth Low Energy to form the direct connection and interaction between a mobile device and the luminaires
- Free app is available to download on iPhone and Android devices

Beacon Muse adjustable optics providing 10 degree tight spot for accent lighting for accentuating the texture, colour and shape of exhibits

Beacon Muse optics optimised to provide a 55 degree wide flood distribution for uniform vertical and horizontal illuminance and wall washing effects

Beacon Muse II is the latest addition to the innovative and award winning Beacon Muse spotlight range. Beacon Muse II boasts improved optical control and provides an exciting accent and display lighting tool that uses cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight.

The unique soft-touch ring enables the end-user to manually adjust the beam to from a wide flood (55°) down to a tight spot (8°); without the need of any additional lenses or reflectors. Beacon Muse II boasts a super high CRI of 97 with the R9 value at 90 -ensuring vibrant reds - the ideal spotlight for museum, gallery and retail applications where a high quality of light is required. Available with trailing edge, on-board dimming potentiometer, DALI or SylSmart Wireless dimming.

## Beacon Muse II

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- Super high colour rendering index, Ra 97 typical with R9 value (saturated reds) at 90; ideal for museum and gallery applications
- Up to 1,081lm focussed at 55 degree beam
- Trailing Edge, on-board dimming potentiometer, DALI or SylSmart Scene Setting versions available. Silver versions on request
- For mounting on L1 1-circuit track (Lytespan 1) or L3 3-circuit track (Lytespan 3)
- Available in 3,000K or 4,000K colour temperatures
- Snap fit accessories (Elongation lens, Softener lens, Honeycomb filter, Barn door and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Beacon XXL is set to revolutionise retail and display lighting. A performance powerhouse, Beacon XXL can deliver an impressive output of up to 5,762lm and a high quality, high intensity lit effect. A variety of CRIs, colour temperature and dimming options make the Beacon XXL the perfect LED replacement for traditional 70W CMI solutions.

## Beacon XXL

Narrow Beam - Black

Medium Beam - Black

Wide Beam - Black

On board dimming

- Beacon XXL is an LED replacement for traditional 70W CMI spotlights, with an impressive output of up to 5,118 fixture lumens from 48W power
- 4,000K Narrow Beam 4,346lm, Medium Beam 4,122lm, Wide Beam 5,118lm
- Ideal for double height spaces, retail and display applications
- High colour rendering index, Ra 93 typical
- Available in 3,000K or 4,000K colour temperatures
- Non dimmable, On-board dimming and DALI versions available
- Narrow (21°), Medium (50°) or Wide (67°) beam options
- For mounting on 3-circuit track (Lytespan 3)
- White or Black paint finishes as standard. Silver available on request
- Barn doors, Elongation lens, Honeycomb and Snoot accessories available
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

Beacon XXL

Dimensions (mm)

Narrow Beam - White

Medium Beam - White

Wide Beam - White

- Beacon XXL High Output is an LED replacement for traditional 70W CMI spotlights, with an impressive output of up to 5,762 fixture lumens from 48W power
- 4,000K Narrow Beam 5,128lm, Medium Beam 4,884lm, Wide Beam 5,762lm
- Ideal for double height spaces, retail and display applications
- High colour rendering index, Ra 85 typical
- Available in 3,000K or ,4000K colour temperatures
- Narrow (21°), Medium (50°) or Wide (67°) beam options
- For mounting on 3-circuit track (Lytespan 3)
- White or Black paint finishes as standard. Silver available on request
- Barn doors, Elongation lens, Honeycomb and Snoot accessories available
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

Beacon XL is one of the latest editions to Concord's award-winning Beacon family. This impressive LED spotlight pushes the boundaries of technology to provide up to 3300 fixture lumens at 42 Watts. Design specifically for shop and display applications, the stylish Beacon XL replaces CMI-T (HID) luminaires and delivers a CRI of 85 (CRI of 97 available on request). Available in black and white, track (L1 / L3) and surface mounted options - 3,000K or 4,000K. Dependent upon your application a variety of beam angles: 12° narrow, 25° medium and 50° wide beams are standard. Beacon XL is also available in non-dimmable, on-board dimming and DALI dimming models.

## Beacon XL

- A comprehensive range of high quality accent LED spotlights; ideal for museum and gallery applications
- 3,000K Wide Beam 2,275lm, 4,000K Wide beam 2,478lm
- 3,000K Narrow Beam 1,675lm, 4,000K Narrow Beam 1,827lm
- Super high colour rendering with CRI 97 typical; with R9 value at 90
- Low glare, dark-light detail for increased accentuation and visual comfort
- Intense Narrow (14°), Medium (33°) and Wide (44°) beam options
- Dimming via On-board potentiometer
- For mounting on 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Honeycomb filter, Barn door and Snoot)
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

From Concord's award-winning Beacon Family, we present Beacon Accent. This range of LED spotlights has been specifically designed for museums, galleries and high-end retail where colour rendition plays an important and active role.

With a super high CRI of 97 and the R9 value (saturated red) at 90; the Beacon Accent range ensures for truer, richer and more vibrant colours.

The addition of the dark-light detail helps to reduce glare and increase visual comfort. Available in 3000K and 4000K CCT's, dimming via an on-board potentiometer and a choice of 3 beam angles – Intense Narrow, Medium and Wide.

## Beacon Accent II

- A comprehensive range of high quality accent LED spotlights; ideal for museum and gallery applications
- 3,000K 1,451lm wide beam, 4,000K 1,578lm wide beam
- 3,000K 503lm narrow beam, 4,000K 576lm narrow beam
- Super high colour rendering with CRI 97 typical; with R9 value at 90
- Low glare, dark-light detail for increased accentuation and visual comfort
- Intense Narrow (10°), Medium (37°) and Wide (52°) beam options
- Dimming via On-board potentiometer
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Softner lens, Honeycomb filter, Barn door and Snoot)

The Concord Beacon range of Spotlights is one of the most comprehensive on the market, providing complete versatility for display and accent lighting applications. Beacon introduces a timeless but contemporary all die-cast aluminium design based around simple geometric shapes offering a selection of beam angles and additional filters and accessories to complete the range.

The Beacon LED spotlight introduces a new lighting dimension to retail and display spaces. Beacon meets the tough demands of these environments by providing good colour rendering, zero UV/IR radiation, reduction in maintenance costs and an energy saving solution over existing lamp sources such as low voltage halogen.

## Beacon II

- A comprehensive range of efficient and high performing LED spotlights; ideal for retail and display applications
- 3000K 1,700lm wide beam, 1,512lm narrow beam
- High colour rendering with CRI 93 typical
- Narrow (12°), Medium (38°) and Wide (55°) beam options
- Trailing Edge (TE), On-board dimming potentiometer or DALI versions available
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Softner lens, Honeycomb filter, Barn door and Snoot)
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Beacon Wallwash LED utilizes a specially adapted asymmetric lens to provide a high quality wallwashing effect within any given display environment be it museums & galleries or retail. Uniform ceiling to floor vertical illuminance of up to 3.5 metres in height at 4.5 metre spacings.

## Beacon Wallwash LED

Beacon Wallwash - White

Beacon Wallwash - Black

- Beacon Wallwash LED uses a specially adapted asymmetric lens to provide a punchy LED wallwash solution, upto 4,916lm
- Uniform ceiling to floor vertical illuminance up to 3.5m height at 4.5m spacings
- Ideal for museum and gallery applications
- High colour rendering index, Ra 95 typical or 85 (High output version) typical
- Available in 3000K or 4000K colour temperatures
- Non dimmable, On-board dimming and DALI versions available
- For mounting on 3-circuit track (Lytespan 3)
- White or Black paint finishes as standard. Silver available on request
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

## Concord

- 99 Lytespan 1
- 102 Lytespan 1 Low Profile
- 103 Lytespan 3
- 112 Lytebeam
- 116 Universal Suspensions

<b>Construction:</b>	Extruded aluminium profile. PVC liner housing 2 copper conductors
<b>Total Max Load:</b>	240 (230) VAC supply 3840w (3680w) Single fuse rated at 16amps Supply cable 3 x 1.5mm <sup>2</sup>
<b>Finish:</b>	Smooth polyester powder paint finish, white RAL 9016, silver RAL 9006 or black RAL 9005

- Polarised 16amp single circuit track system with two conductors
- Suitable for use with Concord single circuit adaptor types
- Choice of formats including low profile
- Universal feeds and couplers with polarisation determined during installation with polarisation tab
- Unique Push-up feed allows power to be fed on or off anywhere along the length of track
- Can be cut on site
- Broad range of universal suspensions
- Polarised and fully earthed to latest international standards

## Single Circuit Track Systems

Starter Track Kit

## Starter Track Kit

- Ideal for surface mounted runs
- Single length or to start a run
- Supplied with Track Unit, Plug-in Live End, End Caps and Surface Mount Clips

## Joiner Track Kit

- Ideal for surface mounted runs
- Extends Starter Track to create straight runs
- Supplied with Track Unit, Plug-in Live Coupler and Surface Mount Clips

Accessories

Code	Description	Weight (kg)	Colour
2007631	Display Hook Suspends signs, cords etc	Max load 5.00	White

Concealed Fixing Starter track

(Single run only) Fixing screw supplied

- Slide PVC Conductor Strip from aluminium extrusion
- Slotted screw keyholes are revealed
- The extrusion can be used as a template
- Screws can be installed at the predetermined centres
- The track can then be offered up and the screws tightened
- PVC conductor strip can then be returned to the extrusion

Through Fixing Starter and Joiner track

(Continuous runs) Fixing screws and screw caps supplied

- Screw caps push into the track at determined distances
- Screw caps can be used as a drilling guide
- When track section is firmly fixed, screw cap covers are pushed on to conceal the screw heads.

**Safety! Screw caps must be used**

**Construction:** Extruded aluminium profile  
PVC liner housing 4 copper conductors

**Total Max Load:** 240 (230) VAC supply  
3840w (3680w) ÷ 3  
Single fuse rated at 16amps  
Supply cable 5 x 1.5mm<sup>2</sup>  
415 (400) VAC supply\*  
3840w (3680w) x 3  
Each circuit separately fused at 16amps  
Supply cable 5 x 2.5mm<sup>2</sup>  
\* 3 phase track connection not allowed  
in the UK For other countries please  
check local wiring regulations

**Finish:** Smooth polyester powder paint finish  
white RAL 9016, silver RAL 9006 or  
black RAL 9005

- Polarised 16amp three circuit track system with a common neutral
- Suitable for use with Concord, Lumiance and other European three circuit adaptors
- Each of the three circuits can be independently dimmed
- Unique Lytespan 3 'venturi' trunk profile in standard or recessed form
- Lytebeam deep trunk profile with empty back channel for cable way, T5 or Lytespan 3 module
- Couplers and feeds are pre-wired and polarised for ease of installation.
- Broad range of universal suspensions
- Polarised and fully earthed to latest international standards

\* When dimming – Other circuits cannot contain non-dimmable luminaires such as metal halide

## Three Circuit Track System

Polarisation Channel

## Planning Aid

- Lytespan 3 track features a polarisation channel running along one side of its entire length. (See opposite)
- All Lytespan 3 feeds and couplers except Live Ends are supplied pre-polarised, with wires for ease of installation
- When planning a scheme it is important that:
  - The polarisation channel is continuous around corners and grids
  - The layout shows the correct view from above

Starter Track Kit

**Starter Track Kit**

- Ideal for surface mounted runs
- Single length or to start a run
- Supplied with Track Unit, Push-up Live Feed, End Caps and Surface Mount Clips

**Joiner Track Kit**

- Ideal for surface mounted runs
- Extends Starter Track to create straight runs
- Supplied with Track Unit, Plug-in Live Coupler and Surface Mount Clips

**Starter Track Kit**

Emergency lighting solutions for track mounting

### Basic components required for a track scheme:

1. Track Unit
- 1a. Indirect L3 track module
- 1b. Indirect T5 batten module
- 2 Live Feed: Feeds power onto track
3. Coupler: Only required if creating runs
4. End Cap: Safely terminates track ends
5. Suspensions: Safely and securely mounts track
6. Optional Accessories

### 2. Live Feeds

Push-up Live Feed

Code	Description	Colour	Type
2027546	Push-Up Live Feed Feeds power on or off anywhere along length of track	White	Left

### 5. Accessories

Display Hook

Code	Description	Colour	Max Load (kg)
2025697	Display Hook Suspends signs, cords etc	White	5.00

- Rod and Floating suspensions provide rigid fixing up to 1m straight down from ceiling. Required for uneven loads or areas exposed to air movement
- Adjustable 3m wire suspensions provide the flexibility to fix from any angle, ideal for sloping ceilings
- Longer lengths available as variants
- Clutch adjustment mechanism allows quick and easy installation and levelling. Excess wire can safely be removed
- Twin pivoting suspensions ideal for grids and corners
- Easy to wire mechanical and electrical rod and wire suspensions enable discrete mains supply
- Wall mounting brackets for wall to wall installations (Lytebeam only)

## Universal Suspensions

### Single, Three Circuit & DALI Track

Wire suspensions - chrome

Rod suspensions - white

Single/three circuit - white

- Rod and Floating suspensions provide rigid fixing up to 1m straight down from ceiling. Required for uneven loads or areas exposed to air movement

Ascent 50 an efficient, super shallow LED downlighter with a depth of only 50mm, available in round die cast aluminium housing it provides the perfect lighting solution for circulation spaces and areas with shallow recess depth.

## **Ascent 50**

- Super slim highly efficient LED downlight with only 50mm recessing depth
- A true economic and efficient replacement for existing CF-L downlights
- Provides efficiency up to 122 lumens per circuit watt
- Long life, 50,000 hours plus @ 70% luminous flux, fit and forget maintenance free lighting solution
- 4,000K options typical CRI Ra80
- Round Die Cast Housing
- Uniformity of design with the same housing 120mm aperture for all options

- Kometa looks and performs like no other lighting fixture by combining ambient lighting with downlighting in a simple stylish luminaire
- It provides a complete lighting solution, without the need to supplement the installation with uplighters and wallwashers, by providing a ceiling illuminance which is 30% of working plane levels and a wall illuminance equivalent to 50%
- This innovative concept provides a good light ratio on all room surfaces.

## Kometa 300 LED

- An innovative circular 300 mm diameter luminaire
- Combines ambient and downlight technologies in one
- Ultimate flexibility with independent switching and dimming options
- Kometa can be housed within a 600 x 600 ceiling tile using lay in tile accessory
- Provides optimum visual conditions ensuring light falls on all surfaces
- Emergency versions available
- Kometa plasterboard ceiling accessory available
- Long life, 50,000 hours plus at 70% luminous flux.

Dimensions (mm)

The Beacon Recessed Adjustable spotlight introduces a new lighting dimension to retail and display space. It meets the tough demands of these environments by providing high quality colour rendering , zero UV/IR radiation, reduction in maintenance costs and an energy saving solution over existing lamp sources such as low voltage halogen.

## **Beacon Recessed Adjustable II**

Round, White

Adjustable Barn Doors

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- High colour rendering index, Ra 97 typical with R9 value (saturated reds) at 90 ; ideal for museum and gallery applications
- 35 degree tilt from ceiling to adjust beam direction
- 21W power consumption, up to 1,150lm, 4,000K
- Compatible with Beacon Muse II accessories

Dimensions (mm)

Myriad Adjustable the next generation in accent downlighting, has the ability to place light wherever you want to create ambience and drama. Ideal for a diverse range of applications, Myriad Adjustable is adjustable through 25° tilt and 360° rotation and features a wide 24° beam angle. Designed to be similar in appearance with other models in the Myriad range this offers uniformity within a lighting scheme. The usual benefits of LED technology apply here in the form of long life, low maintainance and high quality of light

## Myriad Adjustable

- Unique adjustable LED accent downlight delivering warm and comforting light
- Place light where you need it with a 25° tilt angle
- 24° beam angle provides a rich beam of light
- Features ultra efficient LED technology - an ideal Halogen replacement
- 20 Watt Power Consumption
- Lumen output: 1134lm (2,700K), 1404lm (3,000K), 1368lm (4,000K)
- CRI: 85
- Complimentary internal body and bezel colours
- Ideal for high end residential solutions, receptions and hospitality

- The Ocullo LED is 'the' solution for lighting in retail whether it is for display lighting or wider general lighting
- With lumen packages ranging from 3,000lm to 4,325lm the Ocullo provides the quantity of light necessary to effectively illuminate a retail space (replacing a 35W and 50W HID lamp)
- With 90 CRI across the entire range as standard, Ocullo provides brilliant quality of light thereby providing true expressions of colour
- With the utilisation of the specially designed sparkle ring, the Ocullo LED can effectively replicate the sparkle effect observed with traditional HID solutions and with effective thermal management, the Ocullo can deliver high quality light at a very low wattage
- The Ocullo LED is available in Mono (Round and Square), Duo and Trio versions. It is offered with a host of beam angle accessories ensuring you have full freedom and flexibility in the lighting of the end user space

## Ocullo LED V2

Oculo LED Round

- Perfect fitting for the Retail channel with its high lumen package and quality of light
- Available with 3,045lm upto 4,325lm outputs allowing for the replacement of 35W and 50W CMI lamp sources
- 90CRI as standard delivering excellent light quality
- The use of an optimised bright aluminium design utilising a light distribution band we can replicate the sparkle effect of traditional CMI light sources
- High efficiency, will help you comply with Building regulations – up to 95lm/W (total system efficiency on Oculo LED 4,000K version)
- Available in warm white (3,000K) or neutral white (4,000K)
- Supplied with LED driver (non-dimmable)
- Fully adjustable head allowing for gimbular adjustability
- Low maintenance cost with 50,000 hours life expectancy

The art of ultra modern minimalism lives on in the form of Concord Glace Pendant. With it's clean aesthetic lines and cutting edge LED technology, Glace pendant has a 360° ring of super efficient LEDS at its core to provide perfect homogenous light distribution.

## Glace

- Super slim architectural design provides ultra modern minimalism with cutting-edge LED technology
- Utilises low power super efficient LED array providing perfect homogenous light distribution
- Superior fixture lumens when compared to existing 38W TC-DD (High Output versions)
- Aesthetic round architectural form
- Compatible with microwave sensors with presence detection, lux and daylight management for optimum energy saving solutions
- 50,000 hrs life at 70% of the original output L70
- Integral LED emergency options
- DALI dimming versions as standard
- The perfect solution modern circulation spaces and high end reception areas

**Control gear:**

Electronic

**Reflector:**

Vacuum metalised Polycarbonate

**Housing:**

Choice of 3 standard colours: gloss black, matt white, satin silver.  
Custom colours available upon request – please consult your local sales force for more information

- Built to IP65 standard (with standard cable). Highly resistant to corrosion and sea mist - ISO 9227 (equivalent to ASTM B117)
- Wire to base pluggable connection for a quick and easy installation
- LED technology: Reduced energy and maintenance costs. No harmful UV or IR radiation. Long lifetime – more than 50,000 hours
- Design that fits the contemporary cubic design trend and ensures continuity of design across a lighting scheme

**InVerto**

Standard colours

Custom paint finish suggestions  
(available upon request)

- 16W (high efficiency) or 19W (high output) pendant luminaire - only applies on integral driver version
- Adjustable pendant cable (1.7m as supplied)
- Integral or remote driver options
- 3 standard colours: gloss black, matt white and satin silver
- Freedom of installation - only applies on integral driver version: 350mA or 450mA LED driver, resulting in 16W and 19W respectively 2 settings:
  - High efficiency: 16W 1,617lm at 101lm/W 4,000K, 1,566lm 3,000K
  - High output: 19W providing 2,045lm at 107lm/W, 1,980lm at 3,000K
- Optional colour braided cables for contemporary aesthetic look (IP21 rating)
- Comes with a 40° beam as standard.

<b>Control gear:</b>	Electronic
<b>Diffuser:</b>	Diffusing optic made from frosted toughened glass
<b>Housing:</b>	Aluminium housing material

- LED pendant luminaires developed for a wide range of hospitality environments
- Contemporary curved design and diffused ambient light, they will add drama to any restaurant dining area, cafe, lounge space or office reception
- Available in a high quality gloss black or gloss white colour finish, suiting a myriad of interiors and making it the ideal choice for interior designers
- Constructed from a single piece of high quality spun aluminium with a diameter of 600mm, polycarbonate diffuser and an easy to adjust 2m suspension cable

## Nephos V2

Nephos - White

Nephos - Black

- High-end decorative LED pendant with a contemporary curved design
- Perfect for hospitality and residential applications; can be used in restaurants, bars, reception areas or lounge spaces
- Available in gloss black and gloss white colour finishes to suit either a high brightness reception, or an ambient lounge space
- Diffused (direct) light provides a soft and ambient lighting effect
- Aluminium housing material
- 600mm diameter, can be used as a feature pendant or in a group
- Delivers up to 2,127lm (4000K luminaire lumen output), 25W power consumption
- Easy to adjust 2,000mm suspension cable
- Available in warm white (3000K) and neutral white (4000K)
- Energy efficient electronic gear including DALI dimmable versions as standard
- Long lifetime: 50,000 hours life at 70% of the original output L70

## A VINTAGE HISTORY

1853  
The first cricket match was played at Lord's Cricket Ground in 1853. The match was between the Marylebone Cricket Club (MCC) and the Gentlemen of Kent. The MCC won the match by 10 runs.

1882 & 1889  
The first Test match was played at Lord's Cricket Ground in 1882. The match was between England and Australia. England won the match by 10 runs. The second Test match was played at Lord's Cricket Ground in 1889. The match was between England and Australia. England won the match by 10 runs.

1930  
The first day-night Test match was played at Lord's Cricket Ground in 1930. The match was between England and Australia. England won the match by 10 runs.

The circular Concord Colossal ambient luminaire is characterised by its minimalist styling. Colossal is designed to compliment any interior whether it is surface mounted or as a pendant.

Manufactured with a slim powder coated aluminium frame, Colossal is not only beautiful to look at it is also highly efficient with an output of 3,800 lumens and 120lm/W Efficacy. This is achieved through the use of a polycarbonate opal diffuser combined with LED technology, with a diameter of Ø450mm x 70mm depth

## Colossal LED

- Circular architectural surface mounted or suspended ambient luminaire
- Aluminium housing with polycarbonate opal diffuser for a comfortable visual uniformity
- Output of 3,745 lumens and 120lm/W (4000K)
- Ø450mm diameter
- DALI options available, along with 3 hour integral emergency
- Long lifetime of 50,000 hours (L70)

## LIGHT SOURCE INCLUDED

**Control Gear:** Integral electronic gear  
**Emergency:** Integral, 3hr maintained  
**Diffuser:** Polycarbonate, satin opal, UV stabilised  
**IP65 Housing:** Polycarbonate, clear  
**Housing/Trim:** Aluminium, powder coated white  
RAL 9016 or brushed aluminium.  
Other RAL colours and finishes available  
to special order.

- Two contemporary styles – Planar and Radius
- Satin glass effect diffuser for high LOR and excellent diffusion
- Ceiling or wall mounted
- Integral emergency options – suitable for use on defined escape routes
- Halo backlight
- Tamper resistant locking feature
- IP65 for wet areas

## Cassini II LED

Cassini Planar - White

Cassini Planar - Brushed Aluminium

- Excellent flashing provides perfect homogenous light distribution
- Unique feature allowing a choice between High Output or High efficiency with the flick of a switch
- 50,000 hrs life at 70% of the original output L70
- Halo backlight
- IP65 fitting resistant to dust and water jet ingress
- Tamper resistant locking feature
- Ceiling or wall mounted
- Integral emergency options – suitable for use on defined escape routes
- Choice of White and Brushed Aluminium trim finishes
- Compatible with remote microwave sensors for maximum energy savings

189 InVerto Direct/Indirect

191 InVerto Direct

342 InVerto Surface Mounted

**Control Gear:** Electronic  
**Diffuser:** Vacuum metalised Polycarbonate  
**Housing:** Choice of 3 standard colours: gloss black, matt white, satin silver. Custom colours available upon request - please consult your local sales force for more information

- Built to IP65 standard. Highly resistant to corrosion and sea mist - ISO 9227 (equivalent to ASTM B117)
- Wire to base pluggable connection for a quick and easy installation
- LED technology: reduced energy and maintenance costs. No harmful UV or IR radiation
- Long lifetime - more than 50,000 hours
- Design that fits the contemporary cubic design trend and to ensure continuity of design across a lighting scheme

## InVerto

- 30W Direct/Indirect LED luminaire
- Provides a uniform light, while offering a high light output of up to 3,233lm (2 x 1617lm) at 107lm/w 4,000K, 3,130lm total 3,000K
- 3 standard colours: Gloss black, Matt white and Satin silver
- Wire to base with pluggable connection for easy installation
- Comes with a 40° beam as standard.
- Suitable for looping

## LED light control

Simply using smartphones or tablets as well as wireless wall switches

Managing and controlling the light experiences for single or multiple fixtures and luminaries

Set scenes and dimming sequences according to the mood, event or time of day

Simply adding new lighting abilities as a major new element

- No new wiring or wires
- No separate gateway or controllers
- No new dimmers
- Simple installation
- Great cost-value
- Works via Bluetooth

\* Download the mobile app from the Apple Appstore or Google Play Store.

### Easy to install

You don't need any new wiring, switches, devices or networks. Plug in the lighting fixture and pair it with your phone or tablet. No other configurations needed.

### Delightful to use

You can control your lights with an intuitive and visual user interface on your smartphone or tablet.

### Practical daily use

You can use with wireless wall switches. They will have a new life: use them as dimmers and control many lamps with one switch.

### Lighting as Experience

SylSmart is more than just a light switch. With a tap on your smartphone you can set the ambience for drama and visual effect.

3D Reid - Birmingham, England

## Technical information

### Ballast lumen factor BLF (%)

Refers to the ratio of light output from the lamp on emergency operation to the nominal light output.

### Beam Angle

Indicates how broadly the light is emitted from a reflector lamp. It can be thought of as an imaginary cone whose apex intersects the lamp face, and the breadth of the cone extends outwards to the point where luminous intensity has diminished to 50% of the centre beam value.

### Binning

The term binning refers to the variations which occur within a single production batch of LED's such as chromaticity, lumen output and forward voltage. It is important that a specific bin has been identified and selected to ensure a uniform and constantly even lighting installation is achieved. If all the LED's were selected from one production batch and used in the same luminaire or installation, there would be a mix of colour temperatures and brightness levels. For the lighting manufacturer / designer binning is an essential part of LED specification.

MacAdam ellipses methodology was created in 1943 for mathematically constructing ellipses around target points, something which became very useful for the lamp industry. ANSI C78.377 is now the standard for chromaticity specified by the American National Standards Institute. ANSI recommends that lamp manufacturers stay within a "4-step" ellipse. This means that, given a certain target point on the CIE diagram, manufacturers are given a fairly wide range of perceptible differences.

### Candela (cd)

The unit of measurement for luminous intensity, which refers to the quantity of light emitted in a particular direction. The symbol is cd.

### Colour Correlated Temperature (CCT)

An incandescent light bulb is very close to a perfect black-body radiator, so its colour temperature is basically the temperature of the filament. However many light sources, such as fluorescent tubes or high intensity discharge lamps, emit light by processes other than thermal radiation and therefore it is not possible to apply the black-body spectrum. For these light sources it is possible to assign what is known as a colour correlated temperature (CCT). The CCT is the colour temperature of a black-body (Planckian) radiator which most closely matches the colour of the light emitted from the lamp.

Warm White 3,000K

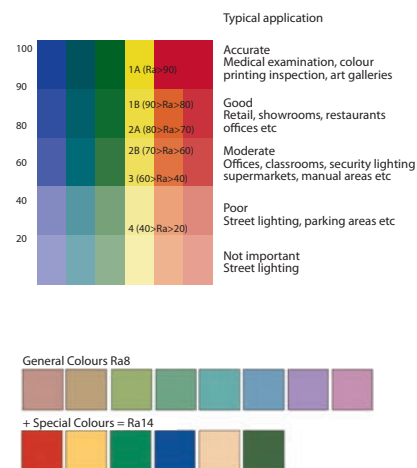

Neutral White 4,000K

### Colour Rendering Index (CRI)

The colour rendering of a light source is an indicator of its ability to realistically reproduce the colour of an object. The chart illustrates our ability to accurately determine colour depending on the colour rendering properties of the light source. The higher the colour rendering index (on a scale of 0 to 100) of the source the better our ability to perceive differences in colour, which is a considerable aid to highlighting fashion products and effective display of coloured artworks.

The CIE colour rendering index (CRI) is a method to determine how well a light source's illumination of eight standardised colour patches compares to the illumination provided by a reference source. At Ra (8) the perceived colour shift of eight reference colours is measured as a percentage and averaged to give one number. However it is currently understood that due to the spectral power distribution of LED's that instead of using the standard Ra8 it is important to include 7 additional colours which include red, yellow, blue & green and use Ra14 to ensure better results.

### Colour Temperature

Colour temperature is a characteristic of visible light that plays a significant role in lighting applications. The colour temperature of a light source is the temperature of a perfect black-body radiator that radiates light of a similar appearance to that of the light source. The colour temperature is measured in units of absolute temperature; Kelvin (K).

Colour temperature works paradoxically to our cultural associations with colour, red as hot and blue as cold. On the black-body curve, blue occurs at higher temperatures than red. A good example is a candle which has a warm red orange appearance but in fact has a low Kelvin temperature, 1,850K. Therefore higher colour temperatures (5,000K more) are called cool colours (bluish white); lower colour temperatures (2,700K – 3,000K) are called warm colours (yellowish white through red).

The Planckian locus shows the chromaticities of black-body light sources of various colour temperatures and lines of constant correlated colour temperature shown within the CIE chromaticity diagram

## Dimmability

The Sylvania lamps range includes Dimmable LEDs lamps. Most conventional dimmers have been designed for incandescent lamps and are therefore rated for higher minimum loads (W) than LED lamps consume. There may therefore be some restrictions in terms of functionality of dimmers with individual LEDs – but when more than one lamp is used to increase the total loading, dimming becomes easier. For full list of dimmer compatibility, please consult your local salesforce.

## Downward Flux Fraction (DFF)

The factor of the total LOR, which is downward, taking the combined ULOR and DLOR as 100%. Using Cassini as an example, the DLOR is 37% and the ULOR is 15% so the combined is 52%. If this is taken as 100% LOR, 72% is downward (37% divided by 52%).

## Drivers

Electronic devices that transform the high mains voltage into a constant current lower voltage for operating the LEDs. A miniature electronic driver is contained inside the base of each Sylvania LED lamp.

## Glare

Discomfort glare is due to a high contrast between the source of light and the task. It is for that reason that luminance values are limited for certain tasks.

## Heat Sink

A device used to conduct heat away from the LED sources and dissipate it to the surrounding air. The more efficiently an LED is cooled the greater its efficacy, light output and lifetime. Materials having excellent thermal properties and optimised cooling fin geometries are engineered into Havells Sylvania lamps and luminaires to deliver the pinnacle of performance.

## Infrared (IR) Radiation

Comprises electromagnetic waves in the spectral range between visible light and microwaves, which produce a heating effect when absorbed by materials. All lamps and luminaires produce infrared radiation, but the quantity emitted by LEDs is far lower than other technologies and this makes them ideal for reducing air conditioning load, as well as for the illumination of heat-sensitive goods.

## Illuminance

This definition determines the amount of light that covers a surface. If  $\Phi$  is the luminous flux and S is the area of the given surface then the illuminance E is determined by  $E = \Phi/S$ . The unit of illumination in SI system is lx, and in foot-pound system it is foot-candle. One lx is the illuminance of 1 m<sup>2</sup> surface area uniformly lighted by 1 lm of luminous flux.

## Junction Temperature (Tj)

The temperature of the Junction of the LED die inside the LED lamp. Measuring the LED die temperature by direct mechanical means is difficult and may lead to erroneous results. It is recommended that the Tj is calculated with manufacturer's data through measurement of the temperature at the solder point (Tsp).

## LED (Light Emitting Diode)

The semiconductor in the LEDs we provide emits blue light. The colour of the light ultimately depends on the phosphors used on the surface of the LED or lens.

## Lens

An optical component having two refractive surfaces, at least one of which is either convex or concave. In LED lamps the function of a lens is to focus or disperse the light rays to achieve the desired beam angle or light distribution pattern.

## Lifetime

LED lamps can have extremely long lives, however their light output diminishes as they age. They can carry on working until they are emitting less than 10% of their initial light output, but with so little light left they would be practically useless. Sylvania defines the lifetime of its LED lamps the same way as for other lamps: i.e. the burning hours until the light output has decreased to 70% of the initial value, or when 50% of a group of lamps will have failed – whichever is the soonest. The International Electrotechnical Commission (IEC) is currently preparing an international standard based on similar threshold values.

## Light

Light Electromagnetic radiation with a wavelength between 380-780nm. Ultraviolet light has a wavelength of less than 380nm whilst infrared light's is greater than 720nm.

## Lighting level

A measure of light falling on a particular point or surface. This unit is measured in lux.

## Light output ratio (LOR)

The ratio of the luminaire light output to lamp light output. The efficiency of the luminaire.

## Lumen (lm)

Unit of luminous flux used to describe a quantity of light emitted by a source.

## Lumen Maintenance

Rated Lumen Maintenance Life (Lxx): The elapsed operating time over which the LED light source will the percentage, xx, of its initial light output.

- L80 = Time to 80% lumen maintenance, in hours
- L70 = Time to 70% lumen maintenance, in hours

For LED lamps and luminaires, lumen maintenance is often shown as curves of relative lumen output over time for the LED under various operating conditions, such as drive current and junction temperature.

## Luminance

The measure of brightness with which the eye perceives an illuminated surface from a certain direction. The luminous intensity per unit of visible surface of a light source (direct) or an illuminated surface (reflection). Luminance is indicated in candelas per square metre (cd/m<sup>2</sup>).

## Luminous efficacy (lm/w)

Indicates how efficiently a light source converts electrical energy to light.

## Luminous flux (lm)

The total light output of a light source measured in lumens.

## Luminous intensity (cd)

The power of a source or illuminated surface to emit light in a particular direction, measured in candelas.

## Lux (lux)

The unit of illuminance, equal to one lumen per square metre (lm/m<sup>2</sup>).

## Technical information

### Illuminance cone

This shows beam angle and illuminance figures at different heights.

### Polar curve

The graphic representation of the luminous intensity in different directions. If two curves are plotted, the distributions are in two vertical planes. They are absolute values.

### Recycling

Havells Sylvania lamps and luminaires are extremely durable and do not contain any mercury, lead or other toxic metals. However because their drivers contain electronic components they must be disposed of as waste electrical and electronic equipment at the end of their life.

### Reflector

An optical component having a reflective surface (the surface could be specular or diffusing depending on the job it is required to do) surface, which captures light rays from the source and bounces them back at a particular angle. Although more commonly used in incandescent and halogen lamps, some Sylvania LED lamps use reflectors to control their light instead of a lens.

### Room index K

An index relating to the dimensions of a room influencing the amount of light emitted from the fitting onto the working surface.

$$K = \frac{a \times b}{h \times (a+b)}$$

where: a = room length

b = room width

h = height between the luminaire and working surface

### Spacing to height ratio (SHR)

Used to determine the maximum distance between luminaires. The ratio of the distance between adjacent luminaires to the distance between the luminaire plane and the horizontal working plane.

### Switching Frequency

LED lamps cannot be switched on and off indefinitely, but are rated to tolerate an impressive 60,000 switching cycles or more.

### TCO (Total Cost of Ownership)

TCO includes all the costs over the entire life of a lamp or for a particular operating time. It covers procurement costs, electricity consumption costs, relamping costs and may even incorporate a reduction in the necessary air conditioning load. LEDs are presently more expensive to purchase than lamps based on other technologies, but their minimal energy consumption results in rapid payback when replacing incandescent and halogen lamps.

### Transformer

A device for reducing the high mains voltage down to a lower voltage. A distinction is made between conventional (magnetic) transformers and electronic transformers.

### Uniformity ratio of illuminance

This indicates the degree of evenness of the light on the working surface and is shown as a ratio of the minimum to the mean lighting level on a surface. It becomes less even as the uniformity decreases. Typically you want 0.7 as a min for most schemes.

### Ultra Violet (UV) radiation

Comprises electromagnetic waves in the spectral range between visible light and X-rays, which are invisible to the human eye but essential for all life (delivered via natural sunlight). Small amounts of UV are emitted by many light sources (e.g. Halogen and Discharge) and over time will cause fading of coloured objects being illuminated. Havells Sylvania lamps and luminaires do not emit any UV radiation.

### Utilisation factor

The ratio of the light flux which the reference surface receives to the total luminous flux. This is influenced by the shape of the room and selected luminaire and is expressed in the form of UF tables.

Abbreviations	Meaning
1	1 pack
1-10V	1-10V Analogue dimmable

# Luminaire Classifications

## Quality Registered

All lighting luminaires produced by Feilo Sylvania are designed, manufactured and tested under a quality assurance system in accordance with BS EN ISO 9001:2000, and are designed to comply with FM 01687. Also, the company also complies with the environmental management system, BS EN ISO14001;1996; certificate number EMS39002.

## Compliance

The European Norm Electromechanical Certification (ENEC) has been adopted as a common mark of conformity with European Standards. A mark issued by any single national approbation body implies compliance with all seventeen international bodies. The ENEC mark now replaces the national test house symbol, and is appended by a number indicating from which test house the approbation originated.

## CE marking

The designated product(s) is (are) in conformity with the provisions of the following European Directives:

<b>2006/95/EC and amendments</b>	Directive of the European Parliament and of the Council of 12 December 2006 on harmonisation of the laws of Member States relating to electrical equipment designed for use within certain voltage limits.
<b>2004/108/EC and amendments</b>	Directive of the European Parliament and of the Council of 15 September 2004 on the approximation of the laws of the Member States relating to electromagnetic compatibility.
<b>2009/125/EC and amendments</b>	Directive of the European Parliament and of the Council of 21 October 2009 on the establishing a framework for the setting of ecodesign requirements for energy-related products.
<b>2011/65/EU</b>	Directive of the European Parliament and of the Council of 6 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

## Voltage

Fittings and transformers are supplied primarily for operation on 230/240V 50 Hz. For alternative electrical specifications contact Technical Support

## Electrical protection

EN 60598

Class I – Luminaire which relies on an earthed metal case to offer protection from live parts in case of failure.

Class II – Luminaire which relies on two layers of insulation to offer protection from live parts in case of failure.

Class III – Luminaire relies on protection against electrical shock relies on supply at safely extra-low (SELV) and in which voltages higher than those of SELV are not generated

## Classification of ballast-lamp circuit for energy efficiency in lighting

### With defined limiting value for each class

According to the CELMA (the European Federation of the National Associations of the manufactures of luminaires, control gears and lampholders) classification scheme the following classes and typical ballast types exist:

- **Class B2:** magnetic ballasts with low losses
- **Class B1:** magnetic ballasts with very low losses
- **Class A3:** electronic ballasts
- **Class A2:** electronic ballasts with reduced losses
- **Class A1:** dimmable electronic ballasts

Dimmable ballasts are classified A1 if they fulfil the following requirements:

- at 100% light output setting the ballast fulfils at least the demands belonging to A3
- at 25% light output setting the total input power is equal to or less than 50% of the power at the 100% light output setting
- the ballast must be able to reduce the light output to 10% or less of the maximum light output

Electronic ballasts (conforming to CELMA energy efficiency scheme classes A1, A2 and A3) are major power savers.

### Radio suppression

EN 55015, EN 61000 & EN 61547

Fittings comply with radio interference suppression and electromagnetic compatibility (EMC) regulations

### Degree of protection

EN 60529

IP rating system is an International classification showing degrees of protection provided by luminaires against ingress by solid objects or moisture.

## Photometric Data

### Illuminance cones

Cones are for single luminaires

Illuminance cones indicate beam spread, ie. a narrow, medium or broad beam of light. The illuminance values given (lux/Klm) are the maximum values within the beam for horizontal planes at various distances below the luminaire. The beam diameter, ie. the approximate size of the light coverage, is also given. The cone widths are calculated for an illuminance at the edge of the cone of 50% of the maximum. By spacing luminaires at the beam diameter for the appropriate height, the combined effect of adjacent cones is to produce an acceptable uniformity along the centre lines between luminaires (figure 1).

figure 1

### Polar Diagram of luminous intensity distribution

These provide a graphic representation of the distribution of light from a luminaire. Often referred to as polar curves, they indicate the intensity, measured in candelas (cd) per 1,000 lumens.

**Note:** If the fitting has a conventional lamp as light source, that is true. If a fitting has an LED as a light source we will publish figures as candelas.

DLOR = Downward light output ratio  
ULOR = Upward light output ratio

The tables provided use luminaire Photometric data that has been measured and tested in accordance with British Standard EN13032-1 'Photometric Data for Luminaires'. Additional photometric data can be provided upon request. All data is also available in EULUMDAT and IES NA formats.

A complementary lighting design service is also available, to provide guidance and recommendations and to ensure lighting solutions are tailored to customer requirements. Supporting this service are the latest computer software facilities enabling accurate predictions and performance checks to be carried out.

## IP & IK Ratings

### Ingress protection ratings (IP)

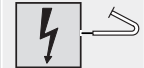

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers.

The first number indicates the measure of protection against the ingress of solids. For instance: 

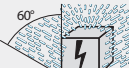

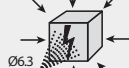

The second number indicates the measure of protection against the ingress of liquids. For instance: 

#### Ingress Protection (IP) Specification Guide

##### Protection against the ingress of solid objects IP.1X

IP No.	Example	Protection against contact and ingress of objects	Tests	Symbol
		Protected against solid objects greater than 50mm ø	A large surface of the body, such as a hand (but no protection against deliberate access). Solid objects exceeding 50mm in diameter.	
		Protected against solid objects greater than 12mm ø	Fingers or similar objects not exceeding 80 mm in length. Solid objects exceeding 12mm in diameter.	
		Protected against solid objects greater than 2.5mm ø	Tools, wires, etc., of diameter or thickness greater than 2.5mm. Solid objects exceeding 2.5mm in diameter.	
		Protected against solid objects greater than 1.0mm ø	Wires or strips of thickness greater than 1.0mm. Solid objects exceeding 1.0mm in diameter.	
		Dust protected	Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment.	
		Dust tight	No ingress of dust.	

##### Protection against the ingress of liquids IP.X1

IP No.	Example	Protection against contact and ingress of water	Tests	Symbol
		Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect	
		Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position	
		Protected against spraying water	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect	
		Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect	
		Protected against water jets	Water projected by a nozzle against the enclosure from any direction shall have no harmful effect	
		Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities	
		Protected against the effects of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time	
		Protected against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer.  NOTE Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.	

## IP ratings in damp areas

Application of IP ratings within damp locations

BS 7671: section 701 (17th Edition)

Guidance is provided by the above standard to the selection of luminaires within locations containing baths, showers and cabinets that contain a shower /and or bath along with the surrounding areas.

a) bath tub

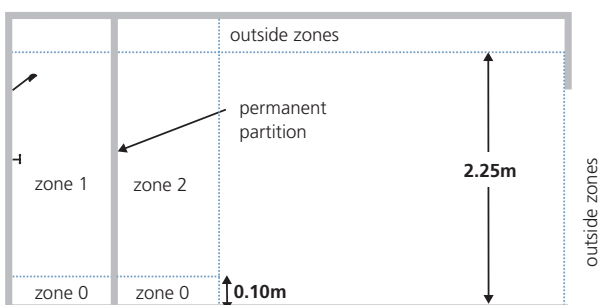

b) shower with basin

\*Zone 1 if the space is accessible without the use of a tool. Spaces under the bath, accessible only with the use of a tool are outside the zones.

c) shower without basin but with permanent fixed partition

## IK ratings

Degree of Impact Protection EN62262.

IK rating system is an International classification showing degrees of protection provided by luminaires against external mechanical impacts.

Number	Measure of protection – impact energy (joules)	Test
IK 00	No protection to this standard -	
IK 01	0.15	0.20kg impact
IK 02	0.20	0.20kg impact
IK 03	0.35	0.20kg impact
IK 04	0.50	0.20kg impact
IK 05	0.70	0.20kg impact
IK 06	1.00	0.50kg impact from 200mm
IK 07	2.00	0.50kg impact from 400mm
IK 08	5.00	1.70kg impact from 295mm
IK 09	10.00	5.00kg impact from 200mm
IK 10	20.00	5.00kg impact from 400mm

When higher impact energy protection is required 50 joules is recommended.

# Guide To Symbols

## Electrical protection

EN60598

 Class I – Luminaire which relies on an earthed metal case to offer protection from live parts in case of failure.

 Class II – Luminaire which relies on two layers of insulation to offer protection from live parts in case of failure.

 Class III – Luminaire relies on protection against electrical shock relies on supply at safely extra-low (SELV) and in which voltages higher than those of SELV are not generated

 Fittings made for mounting in or on furniture made of materials of unknown properties - Only applies to a German national standard for mounting luminaires on furniture.

 Passes the 650° glow wire test in accordance with IEC 695-2-1.

 Horizontal rotation

 Vertical tilt

 Safety isolating transformer

 Electronic transformer

 Electronic ballast/gear

 HID lamp requires an external ignitor

 Ceiling cut-out – round

 Ceiling cut-out – square

 Trailing edge dimmable (capacitive)

 Leading edge dimmable (inductive)

 Ingress protection

 Impact protection

 Minimum distance in metres permitted from lighted object

 European Norms Electrical Certification

 Allowed lamp operating positions

 Universal burning position

 Horizontal burning position

 Vertical burning position

 Incandescent Candle and Ball:  
Base up not allowed

 Lamp can be operated in luminaires without a protective shield

 Lamp should be operated only in a luminaire provided with a protective shield

 Lamp emits a high level of UV radiation

 Reduced UV emissions

 Cool beam reflector

 Not dimmable

 Protection against water contact

 Internal ignitor

 External ignitor

 Ballast is required

 Lamp should not be operated when the outer bulb is broken

 Be aware of high temperatures when replacing lamp

 Do not hold the lamp glass when installing or removing

 Switch off power supply before replacing lamp

 Do not touch lamp with bare fingers when replacing lamp

 Energy saving

 The equipment should not be disposed of in the normal waste stream.

 Read instructions before use

 Lamp complies with legal standards

 German test lab and certifying body, VDE.

 Grüne Punkt

 Loop-in Loop-out / Luminaire can be looped

 RoHS compliant

 WEEE compliant

 Warranty logo, please refer to intro pages for full details

 Ball resistant luminaire

 RAL is European colour matching system, we can offer variant colours on demand

## Specifications

The following notes prepared to meet the company's obligations imposed by the Health & Safety at Work Act 1974 (as amended) are of a general nature only. Specific information regarding installation use and disposal appropriate to individual models is provided in the instruction leaflet packed with the product, or can be found on the relevant pages of this catalogue.

The Health & Safety at Work Act 1974 imposes upon the users of the company's products an obligation to ensure that all personnel involved in the installation, handling, use or disposal of these products are acquainted with the information provided by the company and are made fully aware of any precautions that need to be taken.

The installation of these products should only be carried out by a qualified installer in accordance with the instructions supplied with the product.

### Specifications

Leadership in design is based on constant development and improvement. Whilst great care is taken to give up-to-date information in this publication, the right is reserved to change any specifications herein detailed, without prior notice. All descriptions, illustrations etc, in this publication shall not form part of any contract.

### Track and Spotlights

All track and spotlights are designed for normal, dry interiors, and are not recommended for use in damp or corrosive situations. Adequate ventilation will be necessary when tungsten spotlights are used in confined spaces where elevated temperatures will occur.

### Lamps

Wattage and where applicable type of lamp are shown for every fitting. Incorrect lamps may affect efficiency, change the planned distribution, create glare and in some cases, seriously overheat the luminaire. Unless otherwise stated all luminaires are supplied without lamps.

### Wiring

The majority of luminaires are fully prewired and with heat resistant cable wherever required.

### Weights

Where given, the weights of luminaires do not include lamps.

### Control Gear

Transformers and Control Gear are available for 240V 50HZ and 230V 50HZ with other options subject to special quotation.

240V 50HZ will be supplied unless any other voltage is requested at the time of ordering.

### Ceiling Cut-outs

Throughout this publication cut-out sizes refer to the aperture for the ceiling ring with recessed fittings when mounted in soft fibrous tiles. For timber or metal tiles and cast-in construction, check dimensions on site.

### Product colours and finishes

The Feilo Sylvania range of standard colours has been rationalised. This has given Feilo Sylvania the opportunity to harmonise its standard colours in line with developments that have taken place in architectural materials and building accessories.

For reference the standard paint finishes are now:

#### Concord luminaire

RAL 9005 Jet Black  
RAL 9006 White Aluminium  
RAL 9010 Pure White  
RAL 9016 Traffic White

#### Sylvania Outdoor luminaires

RAL 9007 Grey aluminium

#### LED Lamps

RAL 9023 Pearl dark grey  
RAL 9016 Traffic White

Please note:

- Due to photography and the printing process the colours reproduced in this catalogue may not be truly representative.
- Though paint colours may be the same, gloss, matt, satin and textured finishes will appear different.

### Protection of Electronic Components

All products incorporating electronic components are protected against damage which may result from transients on the mains supply.

The level of protection incorporated is generally in excess of the minimum level specified in the current international standards.

It is the customer's responsibility to ensure that electronic equipment is not subjected to transients above these international immunity standards. In extreme cases additional suppression devices may be needed on the mains supply. The company does not take responsibility for damage to products caused by excessive mains transients.

### Intellectual property rights

Sylvania, Concord and Lumiance are registered trademarks of the Feilo Sylvania group. Many products listed in this catalogue are the subject of patents, copyrights, design rights and other intellectual property rights of Feilo Sylvania.
